They deliberately cripple other programs.

They cost too much, for the volume that they sell - and you have to buy the books separately - so if I pay 300.00 for Win XP, I have to pay them another 30.00-60.00 to get a book to trouble shoot the system?

This is so wrong.

Don't let them get away with everything.

I have no faith in government, and this post is a waste of my time, but I was urged to DO something, so here it is.
